Importance: High
Flag: Flag for follow up

Hi. PFAS Attached are draft points. This is still rather long but I wanted folks to take a look before much more work is done. Please advise.

M

Hi Mary,

Tala revised the paper to use a more conversational tone and address the question of AFFF that I believe was raised by Nancy in an email. Attached is her revised version.

Thanks,
Hans

Subject: RE: PFAS

Also, since the biweekly was just moved a day the asbestos 1-pager can follow the work on PFAS is that helps.

Hi Mary, this was developed and went through DD and OD review already as we heard this was due at 10am. While we've missed the mark on timing due to the fact that OPPT staff and management were in the awards ceremony, we are now receiving different direction from OCSPP IO. When is this due? I've got another request to reformat the asbestos paper after that has already gone through review here as well and several other products due today that require attention. If OCSPP can hold on this until later today I will take a crack at responding to the new direction from 12:14 today.

Hans

Hans. I don't think this fits what Alex asked for below. Can you shorten and make it conversational so that he can merely read from it to answer succinctly. Perhaps then Tala can review the shortened version hopefully when this meeting is done. Thanks

This is what we have. It covers 5 and 6, let me know if you need any additional information. I'm hoping you have what you need here. If Alex wants this shortened this should give the content of what is needed.

Subject: RE: PFAS

I'd be sure to explain in parentheses what is TSCA Section 5, 6, etc. In plain language.

Also maybe less is more.

I think the hope is to put him in a better place to answer a question tomorrow so I'd make it more conversational?

OCIR is pinging and I haven't seen anything.
Jeff/Tala--are there some draft TPs yet?

Thanks!

OPPT:

The Administrators office needs by 10am Monday some bullets to respond to the Tester hearing question. See below. Need a more fulsome answer about why not banned.

In bullets please ensure mention of fact that some regulations (FAA) require some uses.

Please let me know if there are questions.

Thanks,

Nancy

SAC HEARING (April 3): <https://www.c-span.org/video/?459448-1/epa-administrator-wheeler-testifies-agencys-fiscal-year-2020-budget-request>

Tester (29:40): Has PFAS been banned? Senator mentions firefighting foam specifically.

Administrator: Yes, the worst ones, but there are thousands of chemicals. We are evaluating a SNUR for PFOA/PFAS.
